

24-HOUR BLOOD PRESSURE MONITOR

AN APPOINTMENT IS NECESSARY FOR THIS TEST

***PLEASE NOTE THIS TEST IS NON REBATABLE FROM MEDICARE
AND COSTS \$60**

- The 24 hour blood pressure monitor is a lightweight computer that measures blood pressure and pulse.
- The monitor remains on for the entire 24 hours. You will be unable to shower while the monitor is connected.
- Please do not remove the monitor from the carry case. The computer is fragile and will need repair if it is dropped.
- The procedure is not painful; however you may experience tightness in your arm as the cuff inflates. It takes approximately 40 seconds for the cuff to inflate.
- It is important to keep your arm still and relaxed by your side when the cuff is pumping up.
- You will need to return to the collection centre after 24 hours to have the monitor removed.

If you have any concerns or enquiries, please contact the collection centre during business hours.

For further information or to make an appointment, please contact your nearest Collection Centre.

Updated Collection Centre details may be found:
